C-language Environment Test

```
//Solution for the Josephu problem
#include <stdio.h>
#include <stdlib.h>
void Solve(int *J, int n, int m, int k)
    int i = k - 1;
   int s = 0; //计数器
   int f = ∅; //记录出列人数
   while (f < n)
    {
       if (i > n - 1)
           i = 0; //模拟与表头连接
       if (J[i] == 1) //如果有人,报数
       if (s == m) //报到指定数
                                       //报数归零
           printf("%d号出列\n", i + 1); //输出出列序号
                                       //标记为空
           J[i] = 0;
                                       //出列人数+1
           f++;
       }
       i++;
   }
}
int main()
{
   int n = 6;
   int m = 3;
   int k = 1;
    int J[n];
    for (int i = 0; i < n; i++)
       J[i] = 1;
    printf("从%d号开始\n\n", k);
    Solve(J, n, m, k);
    //free(J);
    system("pause");
    return 0;
}
```
